

## ASPHODELACEAE: ALOOIDEAE

### FORMALIZING THE SYNONYMY OF *BULBINE TRIEBNERI*

Klopper *et al.* (2008) reported on the conspecific status of *Bulbine triebneri* Dinter and *B. alba* Van Jaarsv., but neglected to formalize the synonymy of the later name under the earlier name, which takes priority under the rules of the International Code of Botanical Nomenclature (McNeill *et al.* 2006). This is now done here:

***Bulbine triebneri* Dinter** in Poelln., Feddes Repertorium 52: 113 (1943). *Bulbine frutescens* (L.) Willd. var.

*triebneri* (Dinter) Baijnath: 348 (1977). Type: Namibia, 2818 (Onseepkans): Great Namaqualand, Eendoorn, east of Warmbath, (–DA), *Dinter* 7899 (B, lecto.!–K, photo.).

*Bulbine alba* Van Jaarsv.: 37, 39 (2001). Type: Western Cape, 3221 (Ladismith): Little Karoo, Ockertskraal, shale ridge amongst loose fragments, (–CD), 1998, *U. de Villiers Pienaar s.n.* (NBG, holo.).

It is important to note that *Bulbine alba* is not considered to be a nomenclaturally superfluous name, as Van

Jaarsveld (2001) did not include the type of *B. triebneri* in the circumscription of his taxon.

#### ACKNOWLEDGEMENTS

We would like to thank Dr Dee Snijman from the Compton Herbarium for bringing the omission in the previous report to our attention and also Dr Hugh Glen from the KwaZulu-Natal Herbarium for his input and discussions about citing synonymy and the ICBN.
